Decentraland is another Metaverse candidate that grapples with this very issue. Dave Carr of the Decentraland Foundation tells me that the founders decided that “rather than have these environments be controlled by central bodies, they should have a decentralised structure and be open to everyone to own and govern.” From economic matters, to content moderation and even the maintenance of its servers, Decentraland's user base dictates its entire policy course through regular votes.

Generally speaking, Roblox is a safe environment for your kids to spend time in but be warned there are people out there who try to take advantage of the fact that most people playing Roblox are kids. To ensure that your kids can't get scammed I recommend keeping their Roblox password a secret from them so that they can never accidentally give it away.

The games themselves are usually kid-friendly, although some can be scary, and the chat filters in every game do a great job of filtering out any language that could be deemed offensive for younger eyes.

What has made Roblox unique in its field has been the interplay between its enormous constellation of experiences and its personalised avatar system. When you enter any given Roblox world, the user does not assume control of a context-relevant character (think Sonic, Mario, or Lara Croft) but as your persistent, user-created avatar. A virtual You, effectively – whoever you've chosen to be. Add to that an attendant in-game economy which has sprung up to support this expression of identity, with all sorts of user-generated clothing, hairstyles, accessories and skins available to purchase in the platform's avatar shop. Roblox offers an opportunity, then, not just for play, but for digital-first designers and entrepreneurial retailers.

Roblox has 43 million daily active users, Fortnite 25 million, and Facebook Oculus-powered Horizon could potentially tap into billions. All of them might style themselves as Metaverses, but they are not – yet – interoperable with one another. This is an aspect that Bartle feels is antithetical to his definition of the thing. “You can't have a Metaverse, you have to have the Metaverse,” Bartle says.

One of the top games on Roblox, Brookhaven, drops you in a small town, lets you pick a house and car, and gives you free rein to just be a person in the town you loaded in. (It reminded me of a kid-friendly version of a GTA Online roleplaying server.)

At the end of March, rock duo Royal Blood performed during the in-game "Bloxys" awards and premiered a new song. Also, Roblox would really like not to get sued over music rights, so it just signed deals with Sony and BMG.

Matthew Ball – an investor and writer focused on the Metaverse – says that the easiest way to think of it is "as a quasi-successor state to today's mobile internet. Except instead of accessing all the internet via separated 2D web pages or apps, we'll experience it via persistent, interconnected, virtual simulations." It's a wildly ambitious prize with unfathomably lucrative potential. Many contenders are circling the waters, including Epic Games's Fortnite, Facebook's Horizon, VRChat, Core, Sansar, Decentraland, and – of course – Roblox.
